

Contrato Inteligente - Kushtropic Bitcoin (KUSH)

Este contrato inteligente en Solidity crea un token BEP-20 en la red BNB Smart Chain con las siguientes características:

- Nombre: Kushtropic Bitcoin
- Símbolo: KUSH
- Decimales: 18
- Cantidad total: 1,000,000 tokens
- Todos los tokens van a la wallet que despliegue el contrato

Puedes usar este código directamente en Remix IDE para desplegarlo en la blockchain.

```
// SPDX-License-Identifier: MIT
pragma solidity ^0.8.0;

contract KushtropicBitcoin {
    string public name = "Kushtropic Bitcoin";
    string public symbol = "KUSH";
    uint8 public decimals = 18;
    uint public totalSupply = 1000000 * 10 ** uint(decimals);
    mapping(address => uint) public balanceOf;
    mapping(address => mapping(address => uint)) public allowance;

    constructor() {
        balanceOf[msg.sender] = totalSupply;
    }

    function transfer(address to, uint value) public returns (bool success) {
        require(balanceOf[msg.sender] >= value, "Fondos insuficientes");
        balanceOf[msg.sender] -= value;
        balanceOf[to] += value;
        return true;
    }

    function approve(address spender, uint value) public returns (bool success) {
        allowance[msg.sender][spender] = value;
    }
}
```

```
        return true;
    }

    function transferFrom(address from, address to, uint value) public returns (bool success) {
        require(balanceOf[from] >= value, "Fondos insuficientes");
        require(allowance[from][msg.sender] >= value, "No autorizado");
        balanceOf[from] -= value;
        balanceOf[to] += value;
        allowance[from][msg.sender] -= value;
        return true;
    }
}
```
